# Pop Art Selfie Colors

You will create (4) different color schemes using the same portrait.

1) You may use **any colors** you wish for **one** of the portraits

2) You must use an entirely **monochromatic** color scheme (like the expressive eye) for **one** portrait

3) You must use **two** color schemes that are:

   50% tints and shades of one color, and 50% tints and shades of its **compliment** (example: Violet and Yellow, or Blue and Orange)
