

Part 2

Document the animal parts you use by accurately filling in the **Visual Organizer**.

- 1) Identify and sketch to the best of your ability each body part in question. Good drawings that I can understand will receive a more favorable evaluation. Sloppy, messy drawings will be graded unfavorably.
- 2) Just draw the specific animal part. Do not draw the entire animal.
- 3) Write in what the animal type is, and the specific body part used on the indicated line.

Name _____ Hr _____

Evolution Organizer

The diagram is a visual organizer for documenting animal parts. It features four numbered boxes (1, 2, 3, 4) arranged in a square pattern, each containing a line for 'Animal type' and a line for 'Part used'. These boxes are connected to a central box labeled 'Environment type' by thick black lines. The connections are as follows: a horizontal line connects boxes 1 and 2; a horizontal line connects boxes 3 and 4; a vertical line connects boxes 1 and 3; a vertical line connects boxes 2 and 4; and a central vertical line connects the top of the central box to the bottom of boxes 1 and 3, and another central vertical line connects the top of the central box to the bottom of boxes 2 and 4.

1 Animal type _____
Part used _____

2 Animal type _____
Part used _____

Environment type - _____

3 Animal type _____
Part used _____

4 Animal type _____
Part used _____
