

Pop Art Selfie Colors

You will create (4) different color schemes using the same portrait.

First One - You may use any colors you wish for one of the portraits

Second One - You must use an entirely monochromatic color scheme (like the expressive eye) for one portrait

Third One - You must use 50% tints and shades of one color, and 50% tints and shades of its compliment (examples: Violet and Yellow, or Blue and Orange)

Fourth One – Same as above, but with **two different** colors
