

Exercise 2 - Closed and Smiling Mouths

Mouths and Lips are made by sketching the correct angle of the mouth, and by careful observation of light and shadow to create the illusion of depth and realism.

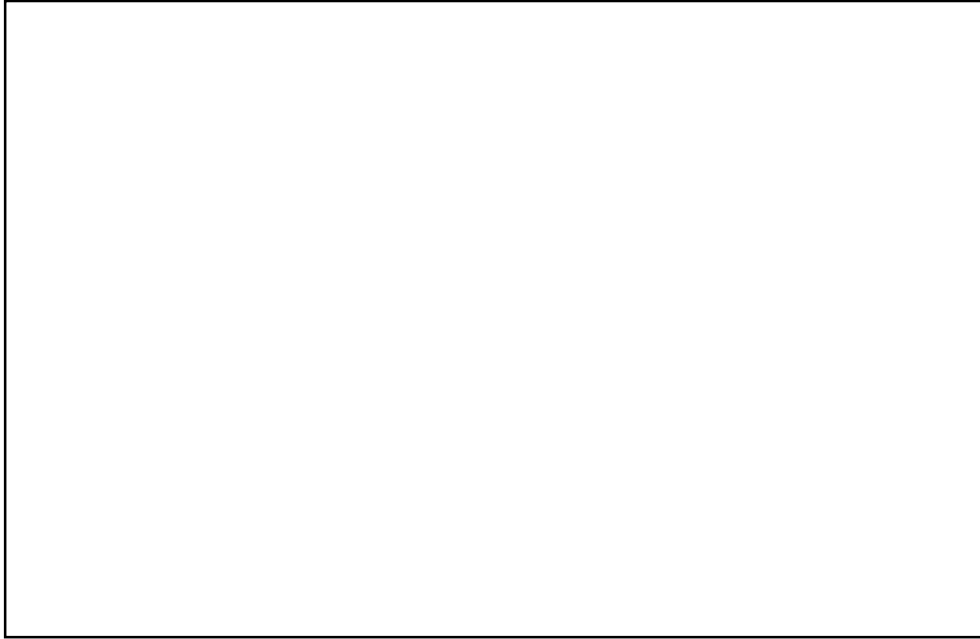

Now try drawing a mouth with the teeth showing. Do not draw the lines between each tooth!

Exercise 2 – Closed and Smiling Mouths

- a) Draw the closed mouth and lips, concentrating on contour outline of the lip shape, and careful observation of light and shadow.

- b) Draw the mouth with lips open showing teeth. Try to resist the urge to draw all the dividing lines between each tooth. This makes you look freaky and predatory!
