# Charcoal Pencil Portraits

Overview: For this assignment you will be using a "grid" drawing to create a detailed and accurate portrait using colored pastel paper, black charcoal, and white charcoal

You may choose any subject you like for this assignment. It must be human.

Process:

a) Procure a high quality image that you can use both as a printed resource, or from your chromebook

b) Send Mr. Page your image via google docs or e-mail. I will insert it into a properly sized digital grid for printing, and also send you back a jpeg version with the grid attached (hopefully).

c) Choose a colored background to use.
d) Lay out your grid correctly, by simply doubling the size of each square
e) Lightly sketch your parameters
f) Identify the lightest and darkest areas. Begin with an area you feel comfortable with first, and begin applying some darker shades.
