

# COMPLEX STILL LIFE

A Complex Still Life Painting isn't really that "complex". It is simply an arrangement of static or "still" objects that possess aesthetic (pleasant to look at) qualities and arranged in a manner that creates a degree of depth.

## Requirements:

- 1) Must have at least 3 different objects
- 2) The objects must overlap somewhere (to create depth)
- 3) There must be many colors used, not monochromatic
- 4) You may NOT copy an existing painting. Photos are acceptable.
- 5) Work from the back to the front. Common sense.
