

## Foreshortening

Foreshortening, method of rendering a specific object or figure in a picture in depth.

Practice the concept of Foreshortening with the human figure. Create a series of drawings using the visual references below. This can be challenging, but very useful to learn.

1) Draw the Hand in all 3 of these positions

FLAT HAND

HAND POINTED TOWARD VIEWER

HAND POINTED AWAY FROM VIEWER

2) Draw the hand attached to the arm. Include the torso, neck and outline of the head please.

3) Draw the entire image below in proper depth and perspective

4) Pick THREE different feet from below to draw in perspective

5) Draw the legs below at the different angles

6) Draw the complete human figure below. Attempt to get the proper size ratios, and perspective. You DON'T have to make him look like a mummy!
