

Use Google Image Search to find a picture that is:

- a) From Life/Photo (NO Artwork or Cartoons)
- b) Challenging and fills most of the page

Change the “search” settings to “Large” images for best quality

When saving the picture, be sure to browse to “**Your Name**” on the server and click save or it will not download properly

Click the downloaded file in the lower left corner of the screen

It will open in windows picture viewer. Click **Print**.

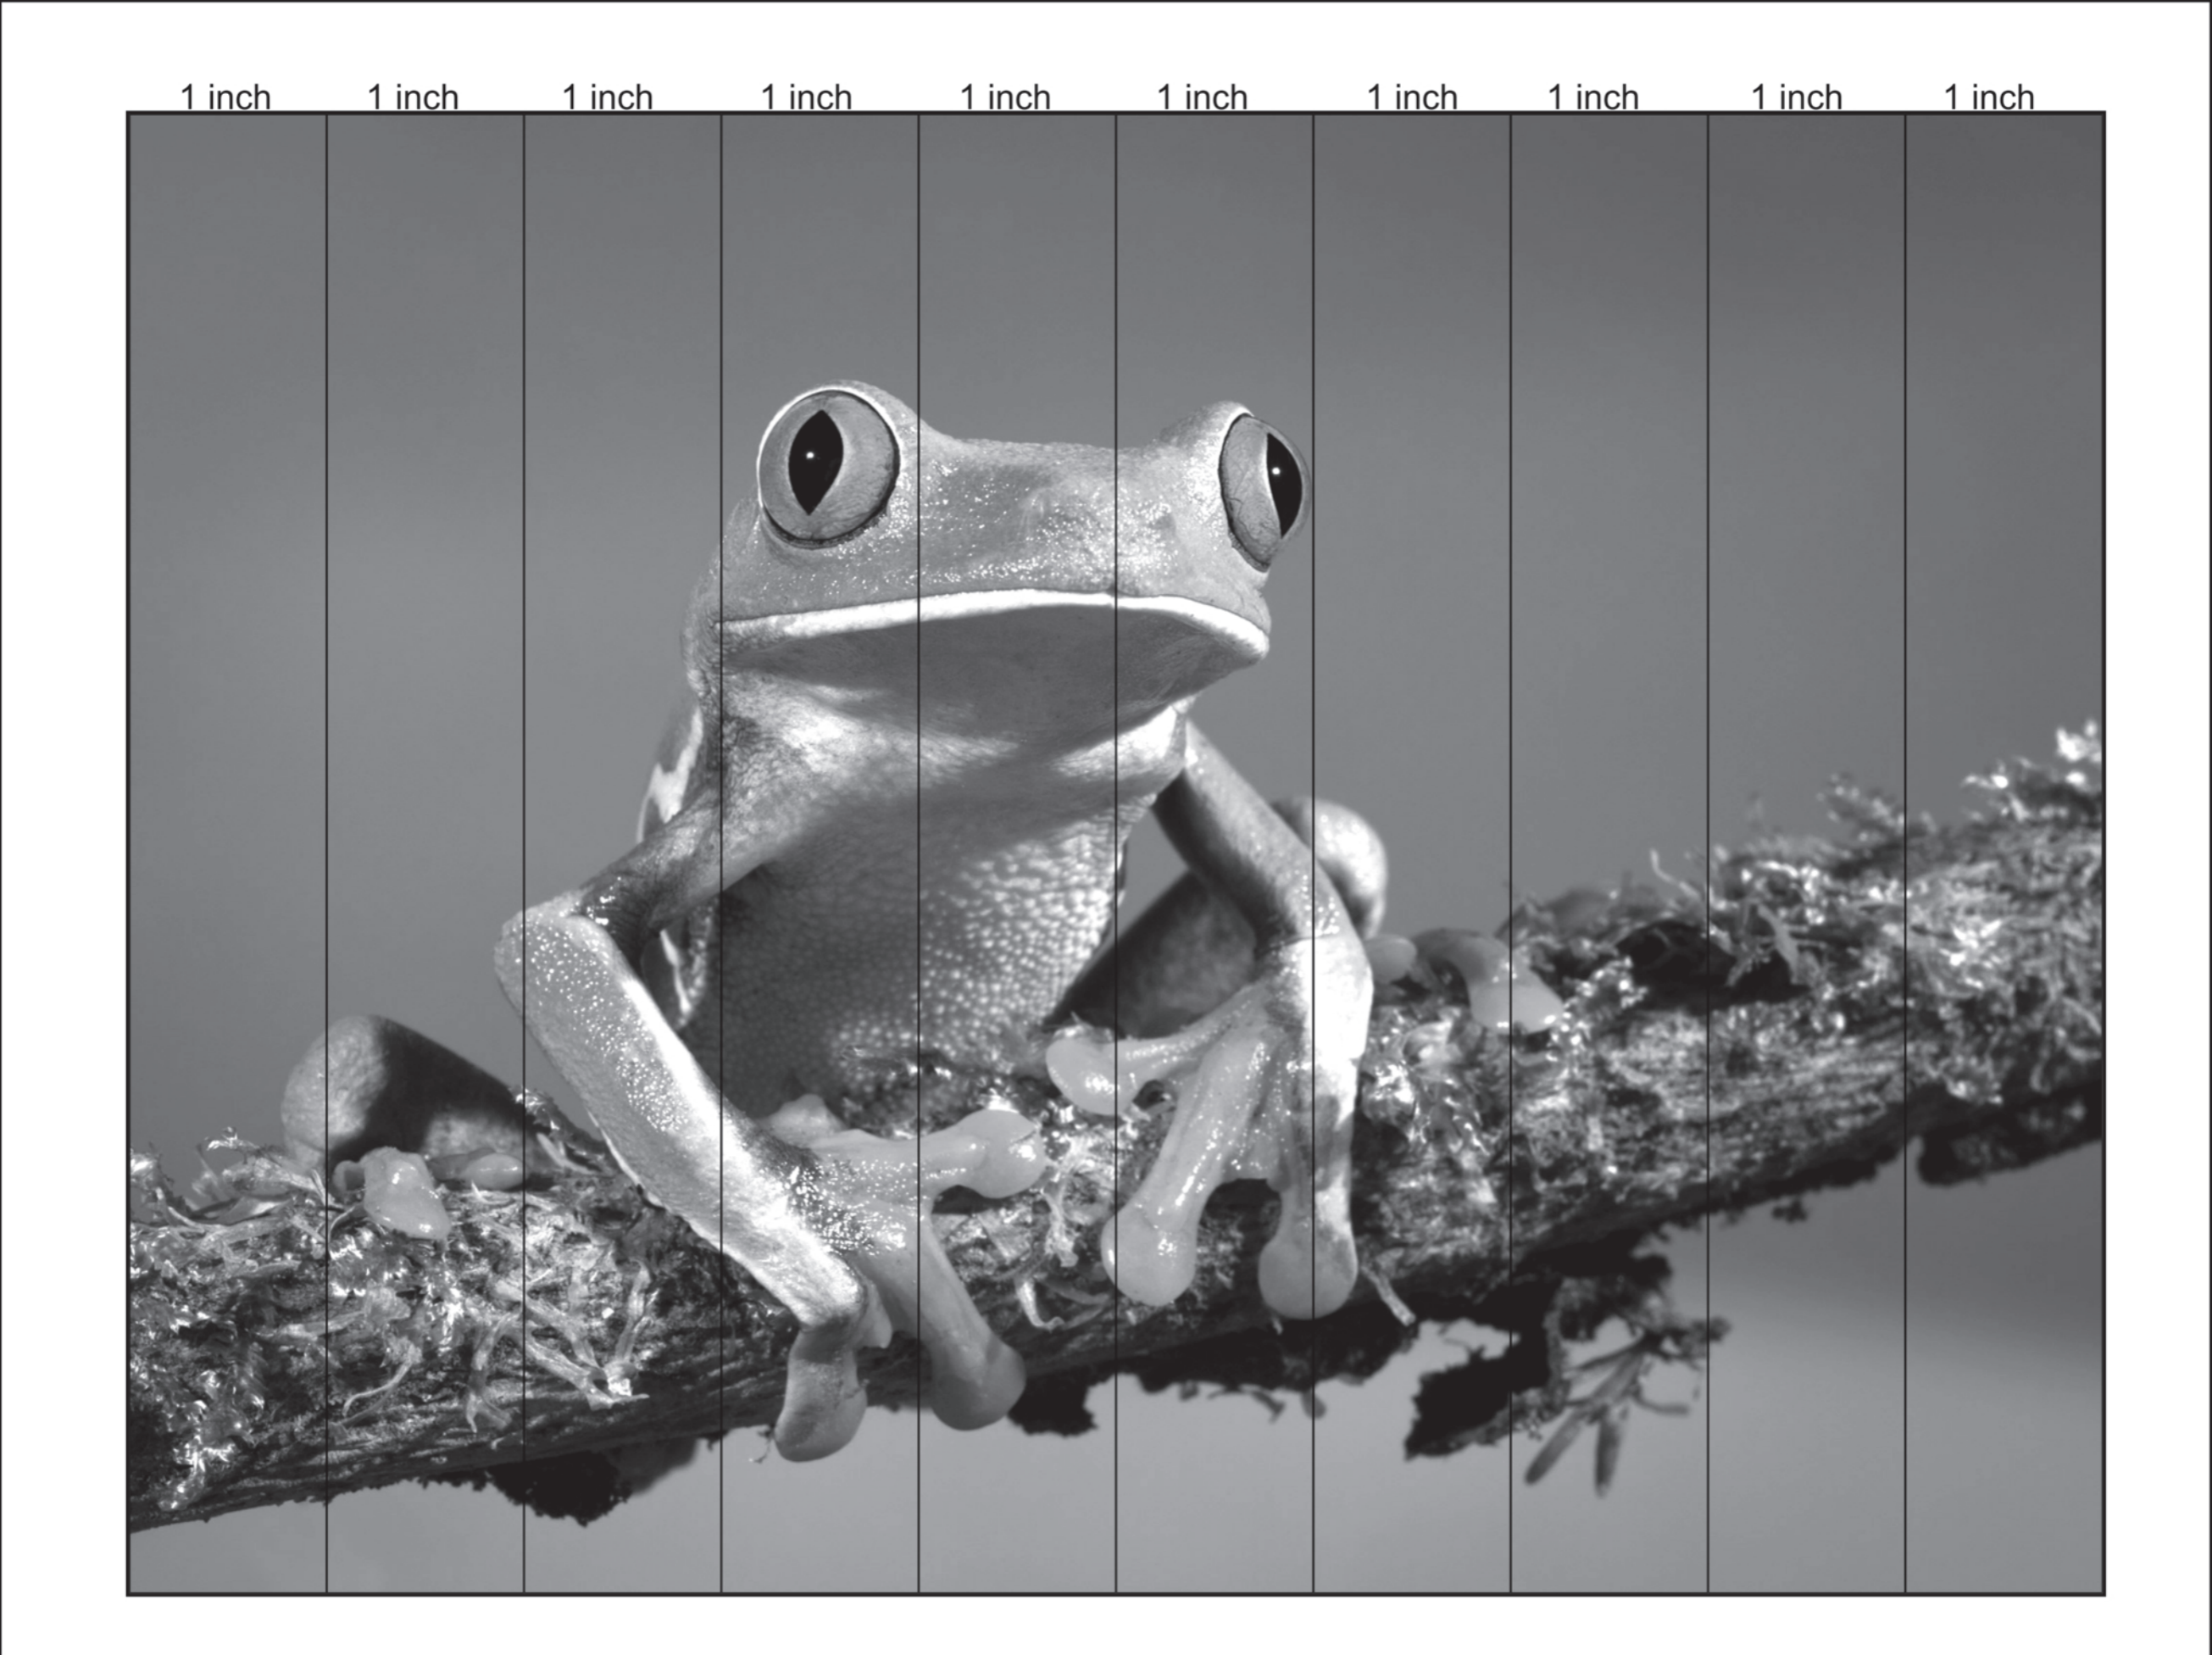

Make sure you have **Printer 1** selected. Look to the right hand part of the screen, and scroll down through the print options until you see “**8 x 10**” and click **OK**

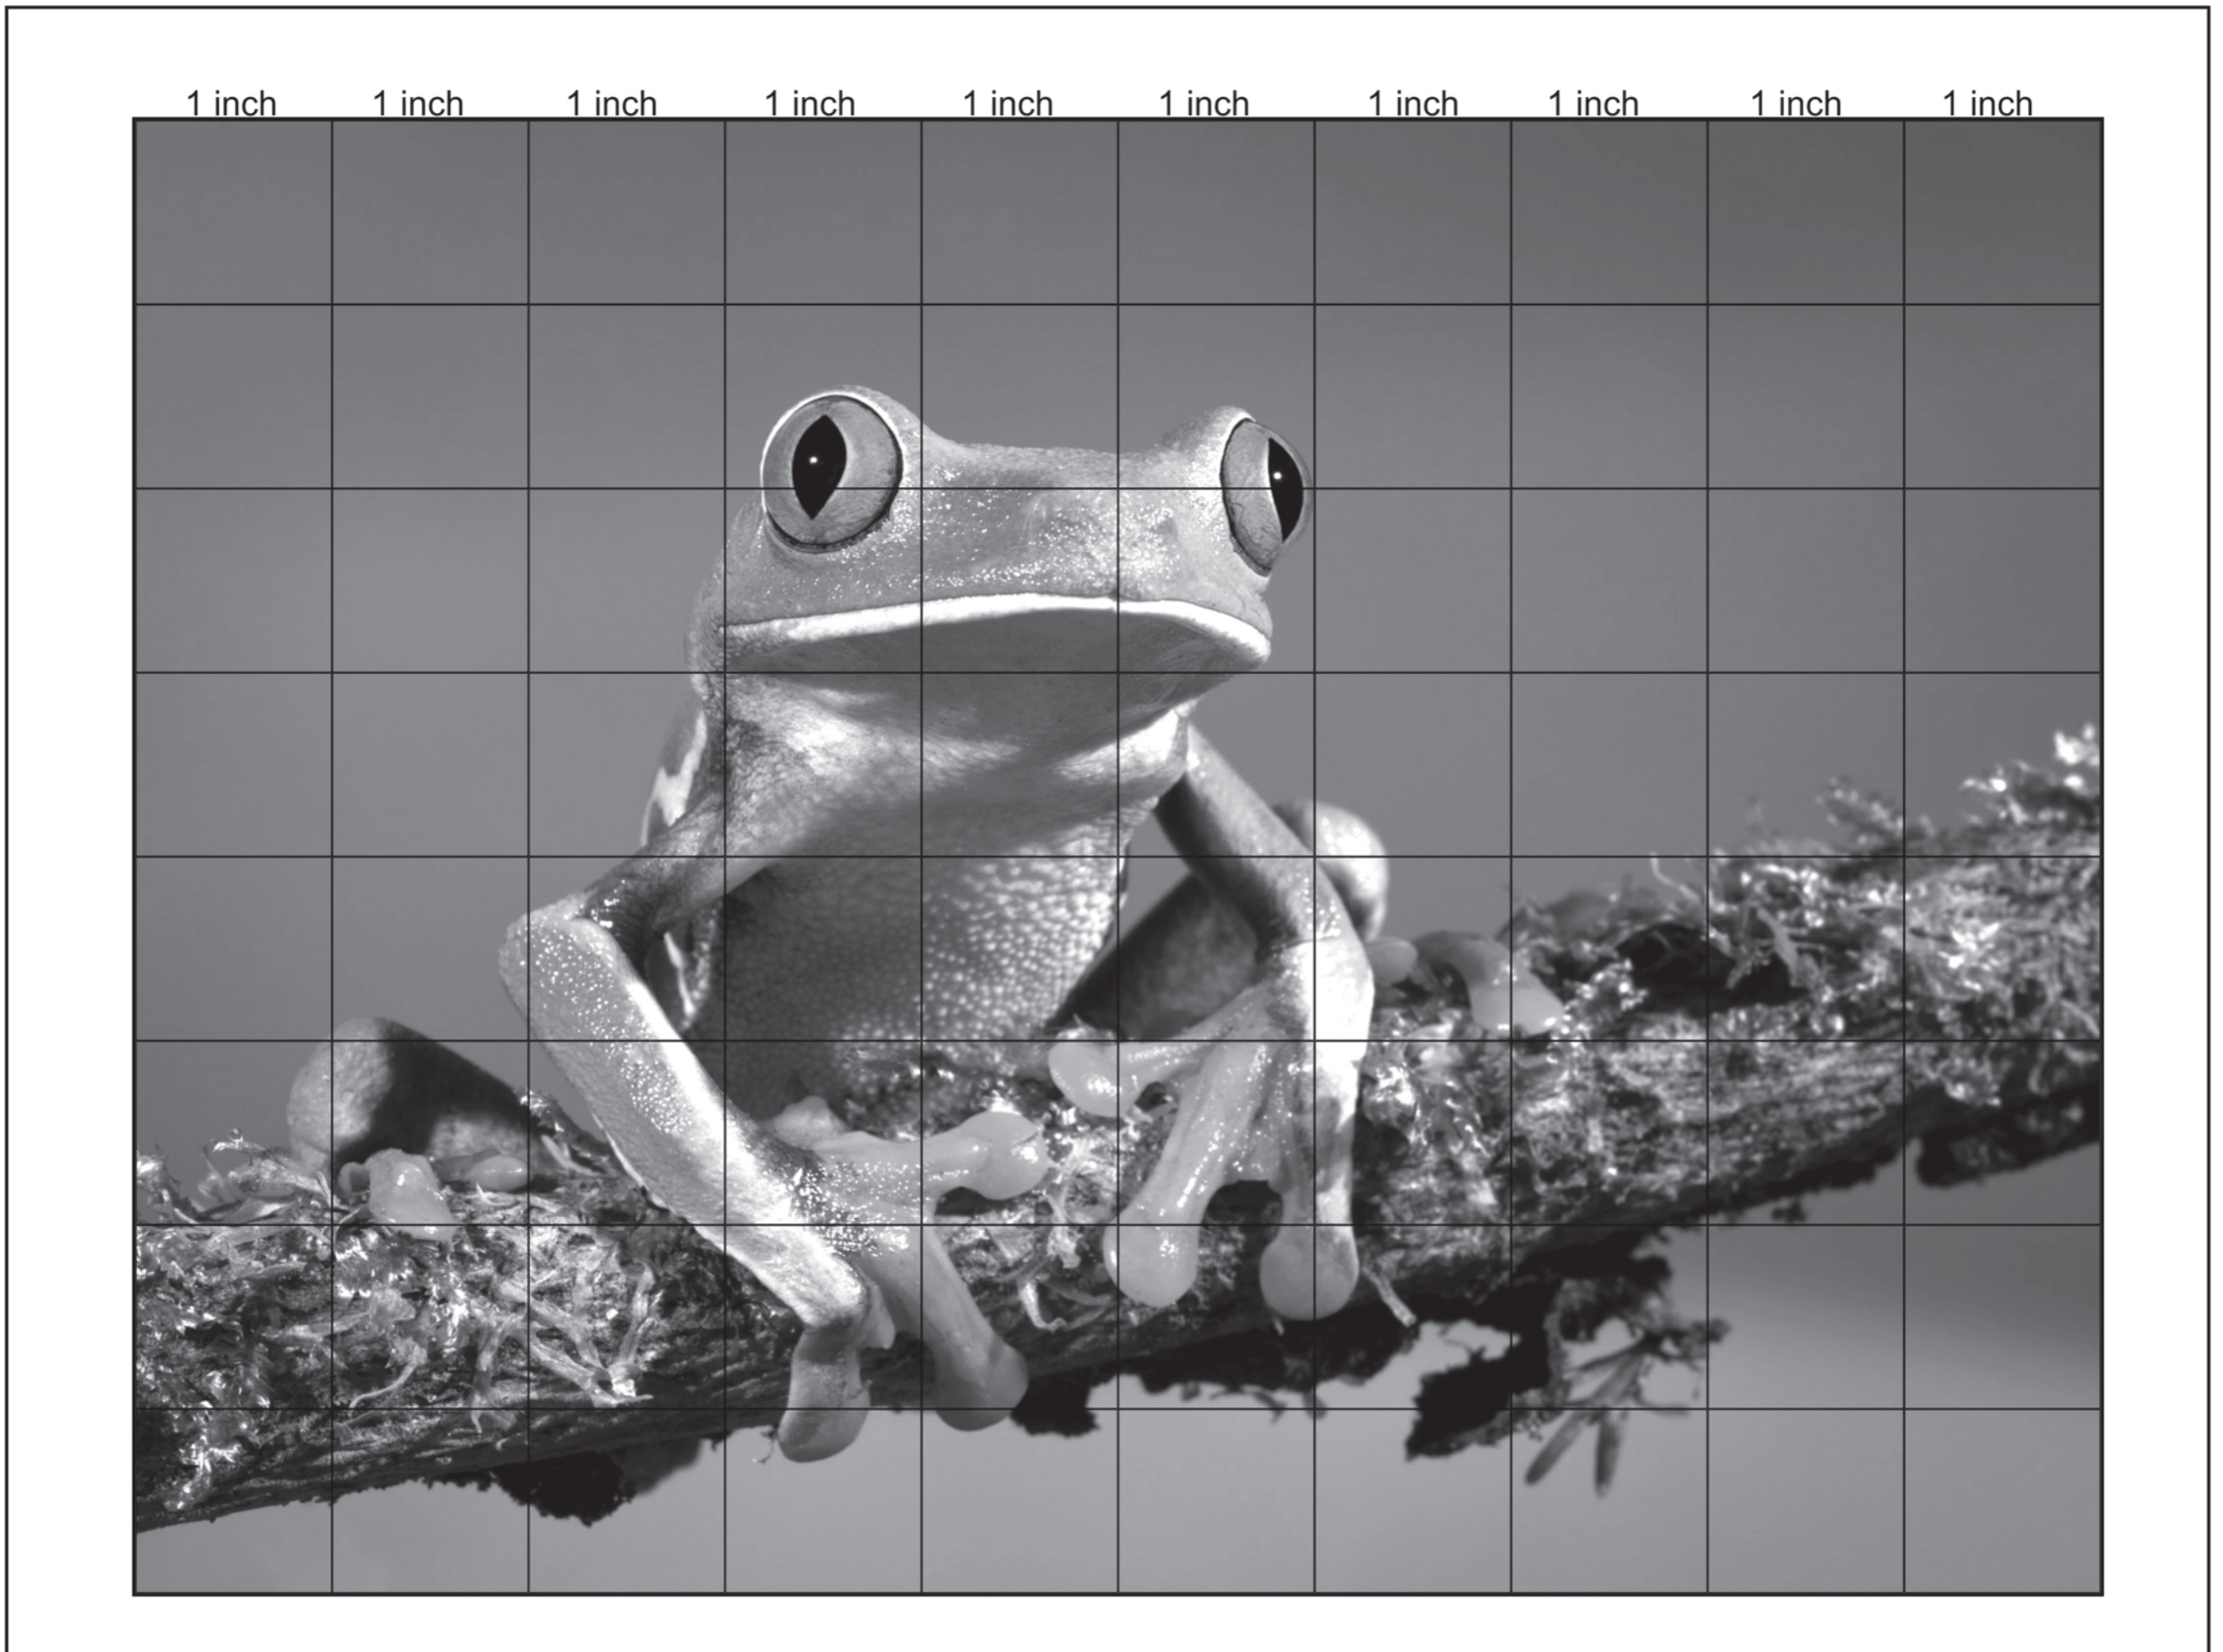

Using a ruler, divide the 8 x 10 image into a 1 inch square grid.

Simply make a mark every inch along the top of the image, then the same along the bottom

Use your ruler to connect the marks similar to below

Repeat the process for each remaining side

Finally, Label the border around your image as shown below

It should match what you have done to your large grid
