

# Name in Ribbon

## Creative Composition

For this drawing assignment you will attempt to create a composition that includes a three dimensionally rendered illusion of your name created with ribbons or ribbon forms.

### Development:

- Student must use their first name, last name, or an approved nickname.
- Practice creating a recognizable rendering of this name, using the concept of a ribbon twisting and turning through space.
- Incorporate a creative background into the name rendering that interacts with the ribbon name. The entire page should be addressed.
- Create a thumbnail drawing of your design to use as reference, and show the teacher for points towards your creative part of the grade.

### Execution and Focus:

- After your design is finalized, use a full sheet of drawing paper to create your final composition.
- Creativity – Your drawing should illustrate an original and creative approach that includes the entire page. Objects and designs should interact with your main ribbon imagery.
- Visual Interest and Variety – Strive to include visual imagery that makes the viewer move their eyes across the page, exploring your various creations
- Rendering – The lines should reflect an accurate depiction of how the ribbon would twist and turn. The shading should illustrate smooth transitions, and reflect very dark and very light values.
- Craftsmanship - Lines and edges are cleanly drawn. Shading not smeared. Not jagged or sloppy unless obviously intentional. Reflects quality and care
